3D Form Inspect Floating License

Floating licensing is now available starting with Version 2.4. A network licensing allows several users to share (float) a single software license over a network for use at different workstations.

A company which chooses to use floating licenses can install 3D Form Inspect on any number of workstations in its facility as long as they are networked back to one

central license server. A single dongle containing licensing information (including the maximum number of concurrent users) is installed on the license server. When a copy of 3D Form Inspect is started, it requests a license from the license server over the network. If the maximum number of concurrent users has not been exceeded, the software is allowed to start, and the server registers the license as in use. When a copy of 3D Form Inspect is exited, the license is then returned over the network to the license server and made available to other users.

System Requirements

In order to work with floating licenses in 3D Form Inspect the following requirements must be met:

- m&h 3D Form Inspect version 2.4 or higher
- A TCP/IP network between the license server and clients where 3D Form Inspect is installed
- A computer to act as the license server and host the network dongle. This can be any workstation in the network which fulfils the end-user's up-time requirements and is installed with one of the following operating systems: Windows 2000 Professional, Windows XP Professional, Windows Vista Business, Windows Server 2000, Windows Server 2003, Windows Server 2008.
- At least one client PC for using 3D Form Inspect fulfilling the minimum system requirements for 3D Form Inspect, and is installed with the Windows 2000 Prof., Windows XP Prof. or Windows Vista Business operating system.
- A Network dongle with a minimum of one 3D Form Inspect user license.
- Setup software and documentation for the license server is provided in the folder 'Server' on the 3D Form Inspect installation CD.
- Setup software and documentation for the clients is provided in the folder 'Client' on the 3D Form Inspect installation CD.
